

Supplementary Figure 1. Recorded changes in body weight of mice at various stages during the experiment

Supplementary Table 1. The average particle size of nanoemulsions in the current experiment

Different emulsion groups	Mean particle diameter (nm)
NanoE	255 ± 8
FLM-N	263 ± 11
SDG-N	237 ± 5
SECO-N	230 ± 5

Supplementary Figure 2. The turbiscan stability index (TSI) of nanoemulsions in the current experiment
