

**Table S1. Scoring EAU histopathologically in the rat**

<b>Grade</b>	<b>Area of retinal section affected</b>	<b>Criteria</b>
<b>0</b>	<b>None</b>	<b>No disease, normal retinal architecture</b>
<b>0.5 (trace)</b>	<b>&lt;1/4</b>	<b>Mild inflammatory cell infiltration of the retina with or without photoreceptor damage</b>
<b>1</b>	<b>≥1/4</b>	<b>Mild inflammation and/or photoreceptor outer segment damage</b>
<b>2</b>	<b>≥1/4</b>	<b>Mild to moderate inflammation and/or lesion extending to the outer nuclear layer</b>
<b>3</b>	<b>≥1/4</b>	<b>Moderate to marked inflammation and/or lesion extending to the inner nuclear layer</b>
<b>4</b>	<b>≥1/4</b>	<b>Severe inflammation and/or full-thickness retinal damage</b>
