

Supplementary Fig. a.: CD spectra (CH₃CN) of the chromatographically resolved Δ - and Λ -[Ru(bpy)₂(L)]²⁺ (where L = 4,4-bis(benzothiazol-2-yl)-2,2'-bipyridine)
: Δ (Band 1)(-) and Λ (Band 2)(-)

Supplementary Fig. b.: The CD spectrum of the dialysate following optical depletion of Λ -[Ru(bpy)₂(bbtb)]²⁺ (leaving the Δ isomer behind).
