A Tris(2,2'-bipyridine)ruthenium(II) Derivative Tethered to a *cis*-PtCl₂(amine)₂ Moiety: Syntheses, Spectroscopic Properties, and Visible-Light-Induced Scission of DNA

Ken Sakai,^{a,*} Hironobu Ozawa,^a Hajime Yamada,^b Taro Tsubomura,^b Mariko Hara,^b Akon Higuchi,^b Masa-aki Haga^c

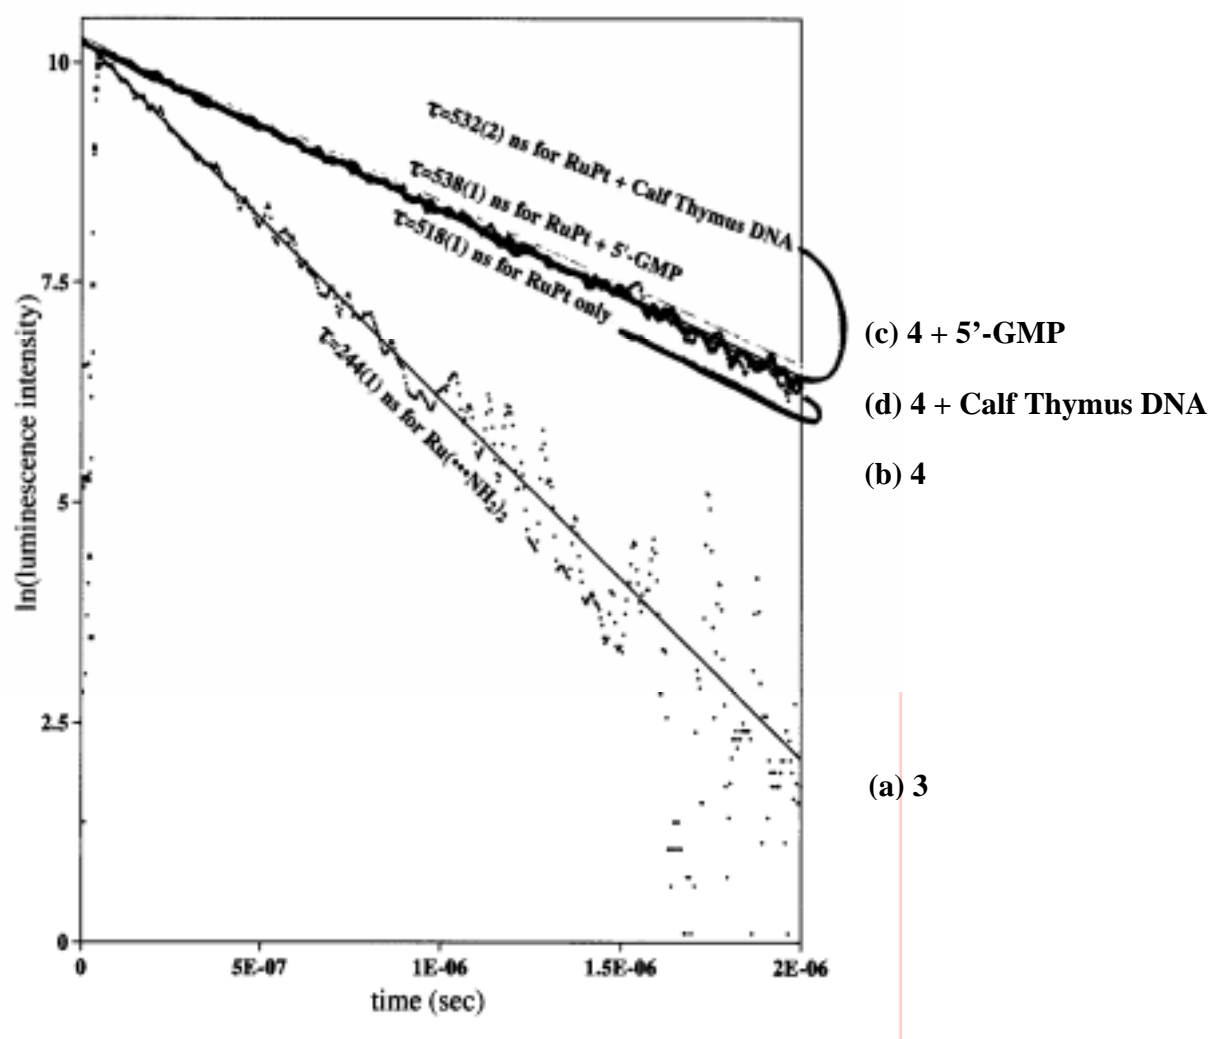

Figure S1. Luminescence decays observed for aqueous solutions of (a) **3**, (b) **4**, (c) **4** and 5'-GMP, (d) **4** and Calf Thymus DNA in air at room temperature. Experimental conditions are same to those given in Figures 3 and 4 reported in the main text.
