

Supplementary data

Supplementary information fig. 1 Cyclic voltammograms of the complex **1** in CH₃CN under aerobic condition. Ferrocene was added as internal standard, being observed near 0.4 V.

Supplementary information fig. 2 Cyclic voltammograms of the complex **3** in DMSO under aerobic condition. Ferrocene was added as internal standard, being observed near 0.4 V.

Supplementary information fig. 3. Cyclic voltammograms of the complex **4** in DMSO under aerobic condition. Ferrocene was added as internal standard, being observed near 0.4 V.
