

Figure S11. Plot of  $X_m T$  vs  $T$  for complex **1** in the 100 - 5 K temperature range and the indicated pressures. The solid lines are simulations of the experimental data. See main text for details.

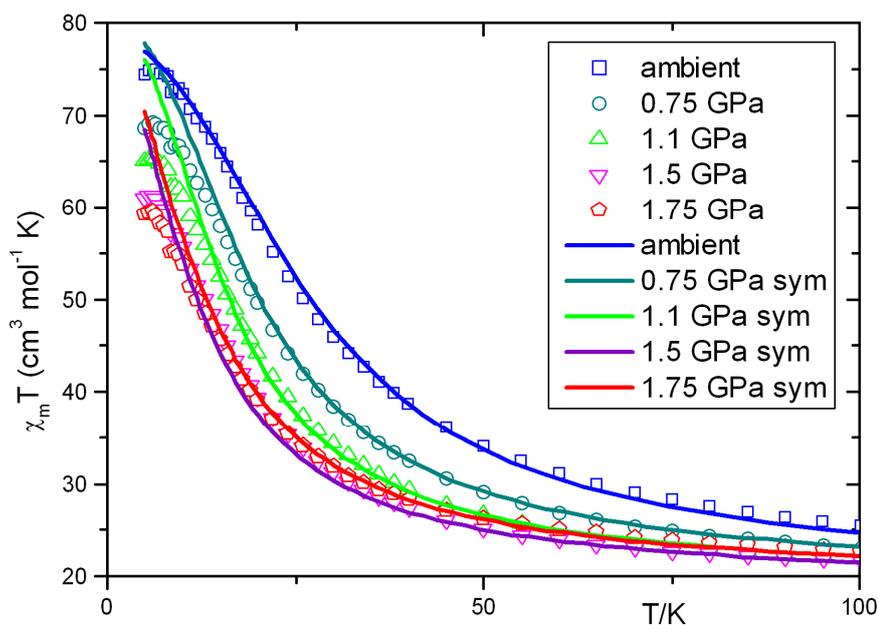

Figure S12. Plot of  $X_m T$  vs  $T$  for complex **2** in the 100 - 5 K temperature range and the indicated pressures. The solid lines are simulations of the experimental data. See main text for details.
