

Coordination Pattern, Solution Structure and DNA Damage Studies of the Copper(II) Complex with the Unusual Aminoglycoside Antibiotic Hygromycin B

^s Elena Gaggelli, Nicola Gaggelli, Elena Molteni, Gianni Valensin, Duccio Balenci, Magdalena Wrońska, Wojciech Szczepanik, Justyna Nagaj, Jacek Skala and Małgorzata Jeżowska-Bojczuk

Supplementary data

Table S1 – ^1H -NMR parameters for HyB 1.5 mM, in the presence of Cu(II) in a 50:1 ratio, in deuterated 20 mM MES buffer at pH 8.8,
¹⁰ ionic strength 0.1M (NaCl) and T 298K. * Fitting not good
