

Supporting Information

Monomeric, trimeric, and tetrameric transition metal complexes (Mn, Fe, Co)
containing *N,N*-bis(2-pyridylmethyl)-2-aminoethanol/-ate: preparation, crystal structure,
molecular magnetism and oxidation catalysis

Jong Won Shin, Sankara Rao Rowthu, Min Young Hyun, Young Joo Song, Cheal Kim,
Bong Gon Kim, and Kil Sik Min

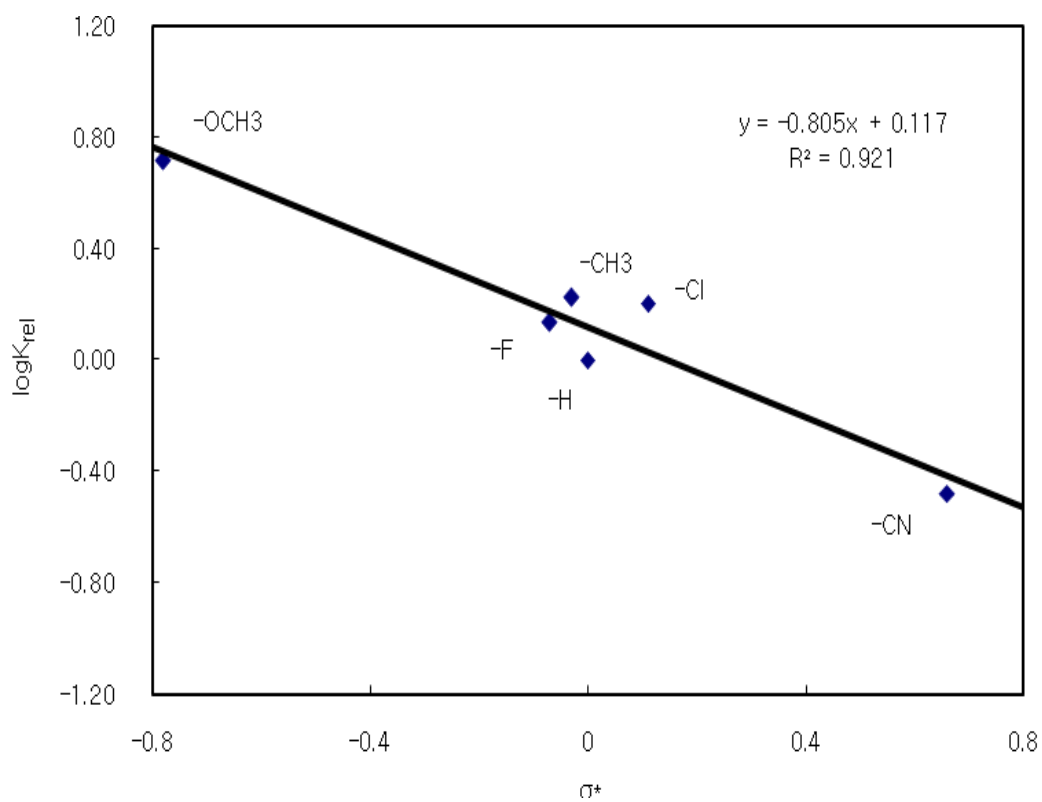

Fig. S1 Hammett plot for relative reactivities of styrene to *para*-substituted styrenes with **6**.
