

## Protonolysis of [ $(^i\text{PrO})\text{TiMo}_5\text{O}_{18}$ ] $^{3-}$ : access to a family of $\text{TiMo}_5$ Lindqvist type polyoxometalates

Laura Coyle, Paul S. Middleton, Christopher J. Murphy, William Clegg, Ross W. Harrington and R. John Errington.\*

### Supplementary Material

**Figure S1** Views of anion **7** and adjacent TBA cations and MeCN molecules in the structure of  $(\text{TBA})_3[(\mu\text{-O})(\text{TiMo}_5\text{O}_{18})_2]2\text{MeCN}$

**Fig. S2**  $^{17}\text{O}$  NMR spectra of  $(\text{TBA})_3\mathbf{7}$  before (a) and after (b) heating to  $110\text{ }^\circ\text{C}$  for 16 h.
