Figure S1. Molecular graph of the complexes **1-6**. All critical points are shown, as attractors by greater circles: BCPs, small red circles; RCPs, yellow ones. The bond paths are also shown.

Figure S2. Effect of Solvent on Absorption Spectra of Complexes 1-6 computed at PBE1PBE/LANL2DZ level.

Figure S3. Effect of Solvent on Phosphorescence Spectra of Complexes 1-6 computed at PBE1PBE/LANL2DZ level.

Figure S4. Natural Transition Orbitals (NTOs) for the Complex **3** and **4** illustrating the nature of optically active singlet excited states in the absorption bands. Shown are only occupied (holes) and unoccupied (electrons) NTO pairs that contribute more than 50% to each excited state. All transitions have mixed ${}^{1}MLCT/{}^{1}LLCT/{}^{1}ILCT$ character.

| Complex | $\lambda_{cal}(nm)$ | | Hole | Electron |
|---------|---------------------|---------------------------|------|----------|
| | 395.6 | S ₂ W=0.99 | | |
| 3 | 282.9 | S ₁₄ W=0.98 | | |
| | 243.5 | S ₃₇ W=0.57 | | |
| 4 | 400.6 | S ₂ W=0.99 | | |
| | 273.3 | S ₂₀ W=0.98 | | t t |
| | 246.3 | S ₃₆ W=0.74 | | |

Figure S5. Natural Transition Orbitals (NTOs) for the Complex **5** and **6** illustrating the nature of optically active singlet excited states in the absorption bands. Shown are only occupied (holes) and unoccupied (electrons) NTO pairs that contribute more than 40% to each excited state. All transitions have mixed ${}^{1}MLCT/{}^{1}LLCT/{}^{1}ILCT$ character.

| Complex | $\lambda_{cal}(nm)$ | | Hole | Electron |
|---------|---------------------|---------------------------|------|----------|
| | 394.5 | S ₂ W=0.99 | | |
| 5 | 282.9 | S ₁₇ W=0.98 | | |
| | 247.1 | S ₄₀ W=0.50 | | |
| | 399.9 | S ₂ W=0.99 | | |
| 6 | 275.9 | S ₂₀ W=0.98 | | |
| | 247.9 | S ₃₀ W=0.46 | | |

Figure S6. The calculated lowest-lying absorption results of complex 3 obtained using different functionals along with the experimental results.

Figure S7. TD-DFT calculation on the lowest-lying absorption of complex **3** using PBE1PBE functional with different basis sets.
