Figure SI1. A sealed DSC sample made of vertically aligned ZnO NRs. The device was made with vertically-aligned ZnO NRs of ~1.8 μm long. IV-curves of the DSC analyzed at CIN2 Laboratory (72°C, black line), and analyzed at RISO-DTU Laboratory (23°C, purple and 38 °C, orange). The sample was analyzed again at CIN2 Laboratory once returned from RISO-DTU (72 °C, grey). Table shows the photovoltaic values obtained for each curve.
