

Supplementary data

Table 1. Liver genes of juvenile brown trout expressed differently up- or down due to 10-day caging at various distances from the pulp and paper mill “Kaukas”, Southern Lake Saimaa (Finland) or at two depths of water, in contact to sediment and three meters from the water surface, in comparison with the reference site 10 km upstream. Data are $\log_2(\text{expression ratio})$, NS – not significant.
