Effects of Adsorption and confinement to nanoporous electrochemistry

Je Hyun Bae, Ji-Hyung Han, Donghyeop Han and Taek Dong Chung*

Department of Chemistry, Seoul National University, Seoul 151-747, Korea

Scheme S1. Reaction pathways in the oxidation of (a) 1-butanol and (b) 2-butanol on Pt electrode in acidic solution. Bold letters at 1-butanol and 2-butanol indicates the predominant reaction pathways.^{1,2}
