

ESI

Surface area and volume based mean particle diameters $d_{3,2}$ and $d_{4,3}$, respectively, of the cocoa particles used in this research. Too little of CP3(1;e) was available to conduct particle sizing and cocoa mass (CM(54)) does not lend itself to the particle sizing employed.

Sample code	$d_{3,2}$ (μm)	$d_{4,3}$ (μm)
