

Supplementary data legends

Supplementary Figure 1. Dose dependent effect of blueberry extracts (Phe, Flv, Acn, Hep) on NE induced cell death. a) Phe; b) Flv; c) Acn; d) Hep. n=100 cells from three independent experiments. #P<0.05 vs control; *P<0.05 vs NE. NE, norepinephrine; Phe, phenolics; Flv, flavonoids; Acn, anthocyanins; Hep, heteropolymers.
