

Electronic Supplementary

Table 2. List of strains, associated species names, number of sequences per strains for each locus and results of automated annotation using ITS, LSU or both loci. Physiological similarities of strains within species names provided by curators or using ITS, LSU or both loci. In columns 5, 8 and 10, character “+” means that the predicted species name is the same as the one provided by the curators, otherwise the alternative name is provided (sometimes with a number after it if it is a sub-cluster within a given species). In columns 6, 9 and 11, character “+” means that the physiological similarities of strains are identical to the ones obtained using species name provided by the curators.

(1) CBS number	(2) Species name by curation	(3) Phy. Sim by species name	(4) No. of ITS seq.	(5) Species name predicted by ITS only	(6) Phy. Sim. Pred. by ITS	(7) No. of LSU seq.	(8) Species name predicted by LSU only	(9) Phy. Sim. Pred. by LSU	(10) Species name predicted by ITS+LSU combined	(11) Phy. Sim by ITS+LSU
