

Table 1 Enriched GO terms with p-value ≤ 0.05 corresponding to the over-expressed genes upon perturbation with the lung-toxic compounds. Terms with corrected p-value less than 0.001 are shown in bold.

GO:0043067 regulation of programmed cell death	GO:0010941 regulation of cell death
GO:0042981 regulation of apoptosis	GO:0010033 response to organic substance
GO:0043068 positive regulation of programmed cell death	GO:0010942 positive regulation of cell death
GO:0006357 regulation of transcription from RNA polymerase II promoter	GO:0043065 positive regulation of apoptosis
GO:0010035 response to inorganic substance	GO:0043066 negative regulation of apoptosis
GO:0043069 negative regulation of programmed cell death	GO:0060548 negative regulation of cell death
GO:0016044 membrane organization	GO:0042592 homeostatic process
GO:0010629 negative regulation of gene expression	GO:0001568 blood vessel development
GO:0051172 negative regulation of nitrogen compound metabolic process	GO:0006468 protein amino acid phosphorylation
GO:0070482 response to oxygen levels	GO:0045892 negative regulation of transcription, DNA-dependent
GO:0001944 vasculature development	GO:0046907 intracellular transport
GO:0008202 steroid metabolic process	GO:0045934 negative regulation of nucleobase, nucleoside, nucleotide and nucleic acid metabolic process
GO:0006917 induction of apoptosis	GO:0016481 negative regulation of transcription
GO:0016125 sterol metabolic process	GO:0012502 induction of programmed cell death
GO:0001666 response to hypoxia	GO:0051253 negative regulation of RNA metabolic process
GO:0008203 cholesterol metabolic process	GO:0010551 regulation of specific transcription from RNA polymerase II promoter

Table 2 Enriched GO terms with p-value ≤ 0.05 corresponding to the under-expressed genes upon perturbation with the lung-toxic compounds. Terms with corrected p-value less than 0.001 are shown in bold.

GO:0022403 cell cycle phase	GO:0022402 cell cycle process
GO:0000278 mitotic cell cycle	GO:0007049 cell cycle
GO:0000279 M phase	GO:0046907 intracellular transport
GO:0048285 organelle fission	GO:0051329 interphase of mitotic cell cycle
GO:0043068 positive regulation of programmed cell death	GO:0010942 positive regulation of cell death
GO:0051325 interphase	GO:0051726 regulation of cell cycle
GO:0043065 positive regulation of apoptosis	GO:0000087 M phase of mitotic cell cycle
GO:0051301 cell division	GO:0000280 nuclear division
GO:0007067 mitosis	GO:0033554 cellular response to stress
GO:0032268 regulation of cellular protein metabolic process	GO:0043067 regulation of programmed cell death
GO:0010941 regulation of cell death	GO:0006468 protein amino acid phosphorylation
GO:0042981 regulation of apoptosis	GO:0006974 response to DNA damage stimulus
GO:0006350 transcription	GO:0080135 regulation of cellular response to stress
GO:0010564 regulation of cell cycle process	GO:0009057 macromolecule catabolic process
GO:0032774 RNA biosynthetic process	GO:0016310 phosphorylation
GO:0051276 chromosome organization	GO:0006357 regulation of transcription from RNA polymerase II promoter
GO:0010605 negative regulation of macromolecule metabolic process	GO:0007059 chromosome segregation
GO:0006913 nucleocytoplasmic transport	

Table 3 Detailed results using the CMAP query tool for identifying drugs whose gene expression signatures have positive or negative correlation to the search query. As a search query the top 500 over- and under-expressed genes were used. The CMAP query tool scored every instance according to its correlation to the search query and sorted the output in descending order. For more details see <https://www.broadinstitute.org/cmap>
