

Fabrication of a bionic superhydrophobic metal surface by sulfur-induced morphological development

Joong Tark Han, Yunseok Jang, Dong Yun Lee, Kilwon Cho, Ji Hwan Park[†], Seong-Hun Song,[†] Deok-Young Ban[†]*

Department of Chemical Engineering, Polymer Research Institute, Pohang University of Science and Technology, Pohang, 790-784, Korea

[†] Kiswire Co., Pohang, 790-840, Korea.

Figure S1. Cu 2p peaks of the surface in Figure 1b, obtained with depth profiling XPS. Each time, the surface was etched by 20nm.
