

Efficient photosensitized energy transfer and near-IR fluorescence from porphyrin/SWNT complexes

J.P. Casey, S.M. Bachilo, and R.B. Weisman

Supplemental Information

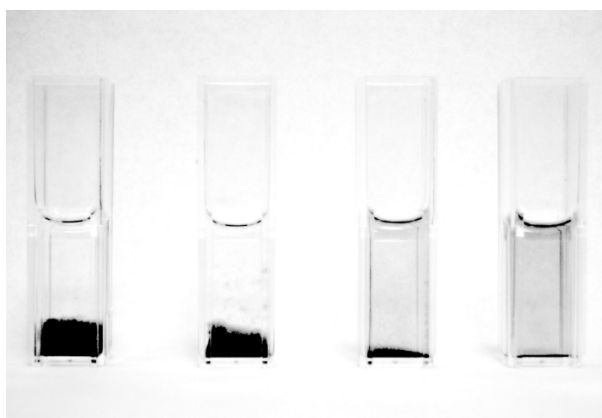

Fig. S1 Photos of a 15 mg/L SWNT suspension in 1% TX100 1 week after preparation. From left to right: 0 μM , 1.5 μM , 3 μM , and 4 μM added TPP.
