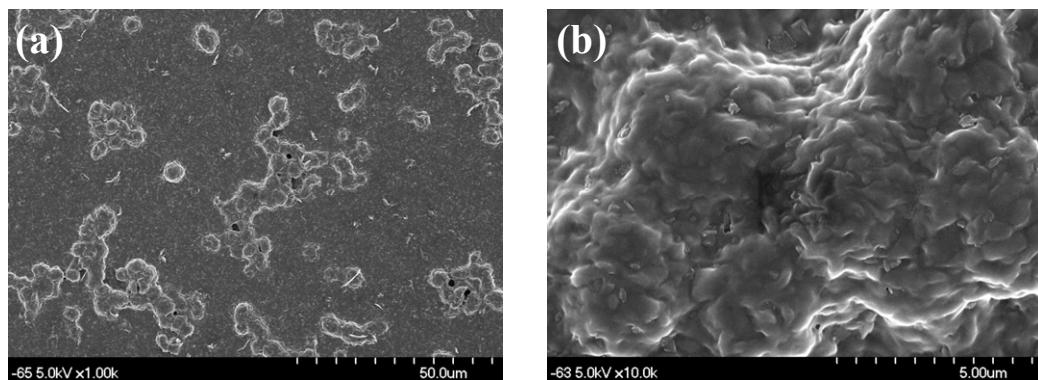

Figure S1. SEM micrographs for the Pani-SBu samples cast directly from the NMP/EG co-solvent solution, before the dithiol treatment. The magnifications are: (a) 1k and (b) 10k.

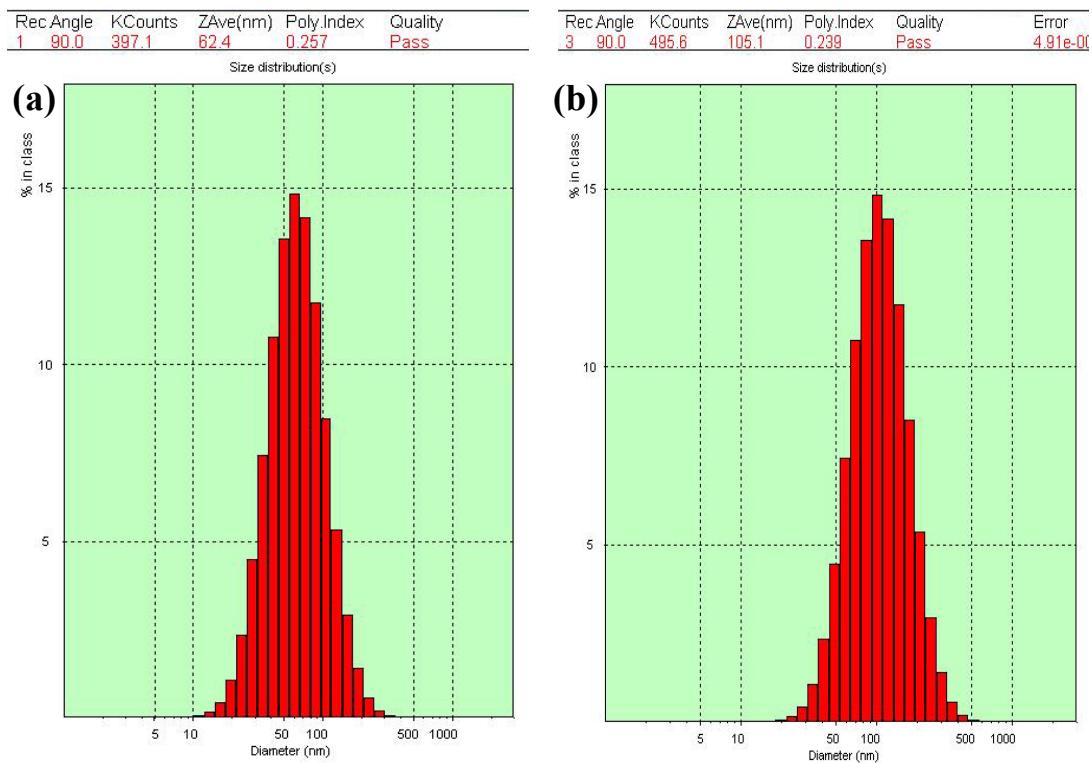

Figure S2. Dynamic light scattering (DLS) studies for the Pani-SBu micelle-like self-assembly (3.67 mM) in the NMP/EG ($v;v = 1/2$) co-solvent medium after being equilibrated at 60 °C for 1 h : (a) before, and (b) after the addition of ethane-1,2-dithiol (0.025 equiv).
