

## Electronic Supporting Information

**Fig. S1** Temperature-dependent paramagnetic susceptibility ( $\chi$ , black square) of polycrystals of  $1 \cdot \text{FeCl}_4$ . The red solid line indicates the Curie-Weiss fitting.

**Fig. S2** Temperature-dependent paramagnetic susceptibility ( $\chi$ , black square) of polycrystals of  $2 \cdot \text{FeCl}_4$ . The red solid line indicates the Curie-Weiss fitting.
