Supplementary Material (ESI) for Journal of Materials Chemistry

This journal is (c) The Royal Society of Chemistry 2009

Supporting information

Study of the influence of the metal complex on the cytotoxic activity of titanocene-functionalized mesoporous materials.

This supporting information contains:

- 1. Solid-state ²⁹Si NMR spectra of all the studied surfaces
- 2. Pore distribution for all the studied materials

1. Solid-state ²⁹Si NMR spectra of all the studied surfaces
