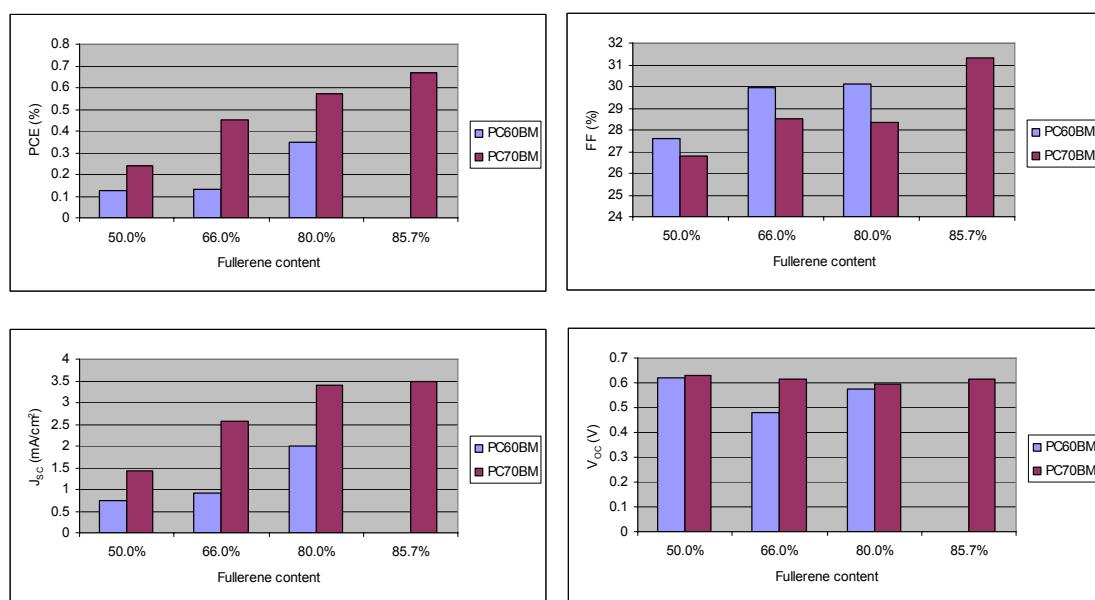

Figure S1 Effect of fullerene weight concentration on the performance metrics of P2/Fullerene blend devices cast from Chlorobenzene and heat treated at 130°C for 10 minutes. Devices were characterised under 1 Sun simulated AM1.5 solar irradiation.

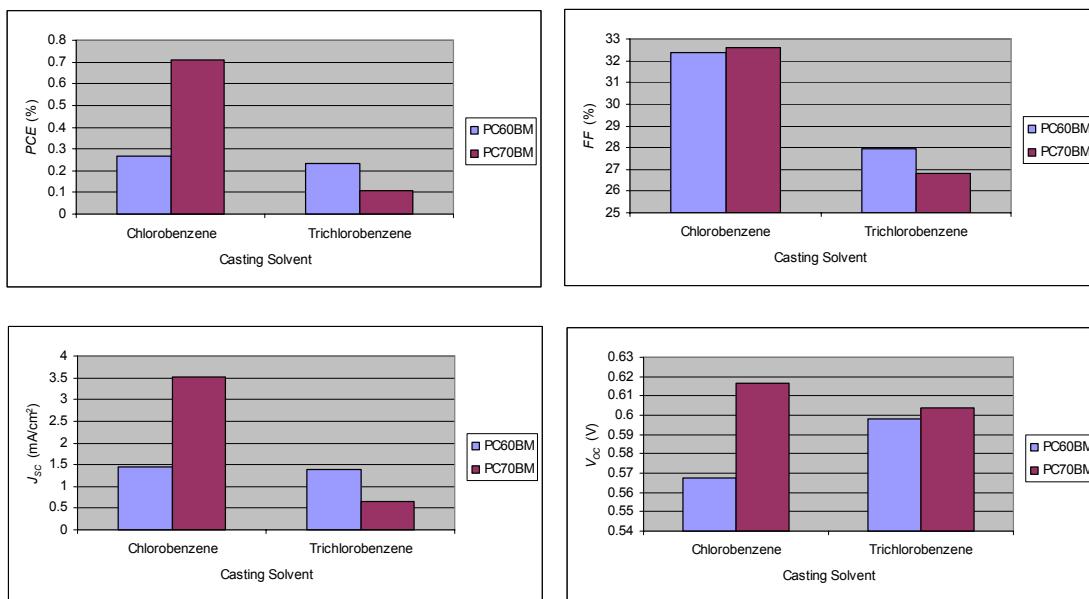

Figure S2 Effect of casting solvent on the performance metrics on 1:4 P2/Fullerene blend devices after heat treatment for 5 minutes at 150°C. Devices were characterised under 1 Sun simulated AM1.5 solar irradiation.

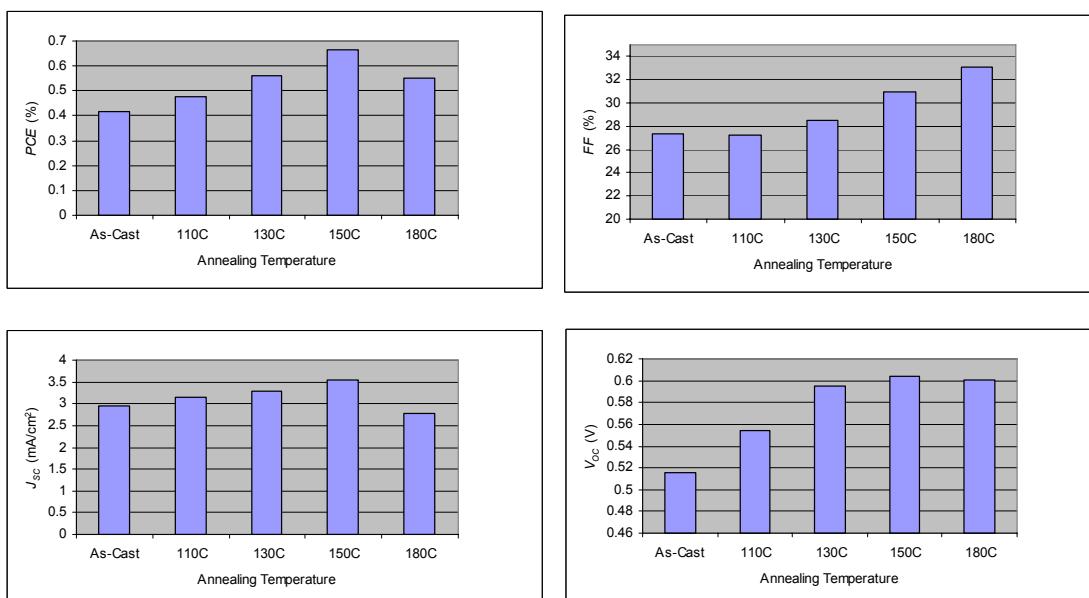

Figure S3 Effect of thermal annealing temperature on the performance metrics on 1:4 P2/PC₇₀BM blend devices. All devices were annealed for 30 minutes at the stated

temperature. Devices were characterised under 1 Sun simulated AM1.5 solar irradiation.
