A novel approach for transferring water-dispersible graphene nanosheets into organic media†

Chao Zhang,^a Weng Weei Tjiu,^b Wei Fan,^a Shu Huang^a and Tianxi Liu^{*a}

Electronic Supplementary Information

Figure S1. XRD patterns of GOS, v-GS, and o-GS.

Figure S2. TGA curves of neat TPU and its composites.

Figure S3. The thermal stability (5% weight loss temperature in TGA) and the residues at 700 °C for neat TPU and its composites as a function of o-GS concentration.
