

Reversibility of hydrodynamic focusing for recycling sheath fluid

Nastaran Hashemi, Peter B. Howell, Joel P. Golden, Jeffrey S. Erickson, Frances S. Ligler

SUPPLEMENTAL INFORMATION

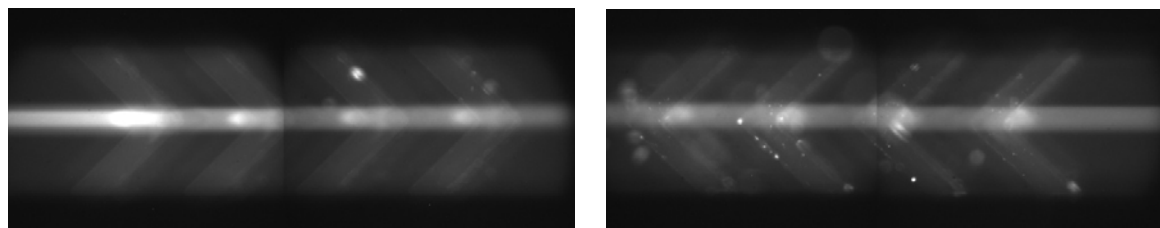

Figure A1. Left figure shows the inlet chevrons and right figure shows the reversed chevrons placed after interrogation region. The sample stream includes a fluorescent dye.

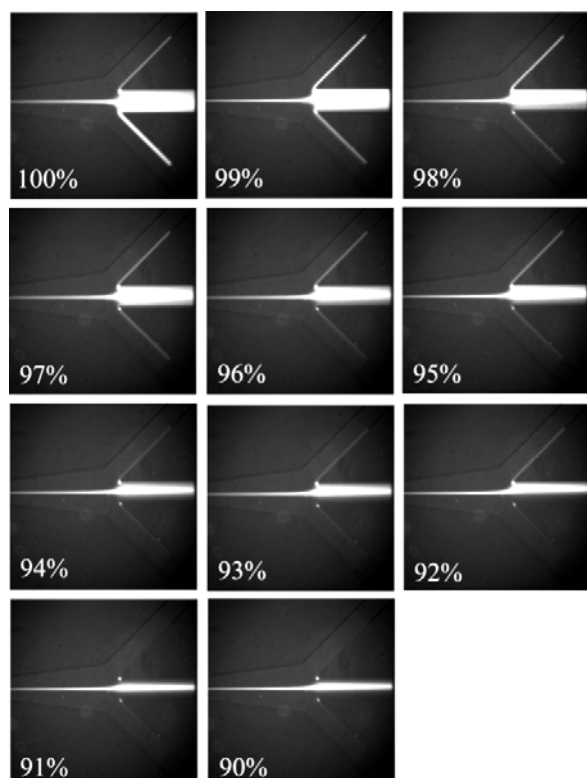

Figure A2. Images of outlet channels at 100% to 90% recycled sheath fluid containing fluorescent dye. Images are taken using a Nikon fluorescent microscope.
