

TABLE 1

Identification of proteins in *A. radioresistens* S13, grown on acetate, benzoate and phenol.^(a) corresponding to Fig. 2, ^b theoretical pI; ^c theoretical mass). Results of *De Novo* sequencing are underlined, while those obtained by peptide mass fingerprinting (PMF) are indicated in **bold**

Spot n. ^a	Location	Annotation UniprotKB	UniprotKB code	Sequence coverage	score	Identified peptides (<u>De Novo sequencing</u> /PMF)	pI ^b	Mass (kDa) ^c
