

Supplementary Materials

De novo prediction of non-coding RNA-protein interactions

Ying Wang, Xiaowei Chen, Zhi-Ping Liu, Qiang Huang, Yong Wang, Derong Xu, Xiang-Sun Zhang, Runsheng Chen and Luonan Chen

Contents

Supplementary Table 1. The NPInter data set.

Supplementary Table 2. The features enriched in the positive samples for $k=3$.

Supplementary Table 3. The features enriched in the negative samples for $k=3$.

Supplementary Table 4. The results of NB classifier and ENB classifier for a balanced positive and negative sample set.

Supplementary Table 5. The list of 759 proteins for the prediction of interactions with 30 ncRNAs in worm.

Supplementary Table 6. The predicted interactions for 30 ncRNAs and 759 proteins using ENB classifier trained on RPI369.

Supplementary Table 7. The predicted interactions for 30 ncRNAs and 759 proteins using ENB classifier trained on RPI2241.
