

Electronic supplementary material to: Structural studies of N-(2'-substituted phenyl)-9,10-dihydro-9,10-ethanoanthracene-11,12-dicarboximides by X-ray diffraction and NMR spectroscopy – Proofs for CH/ π interactions in liquid and solid phases (New J. Chem.)

Chosen arrangements of conformations in compound 1

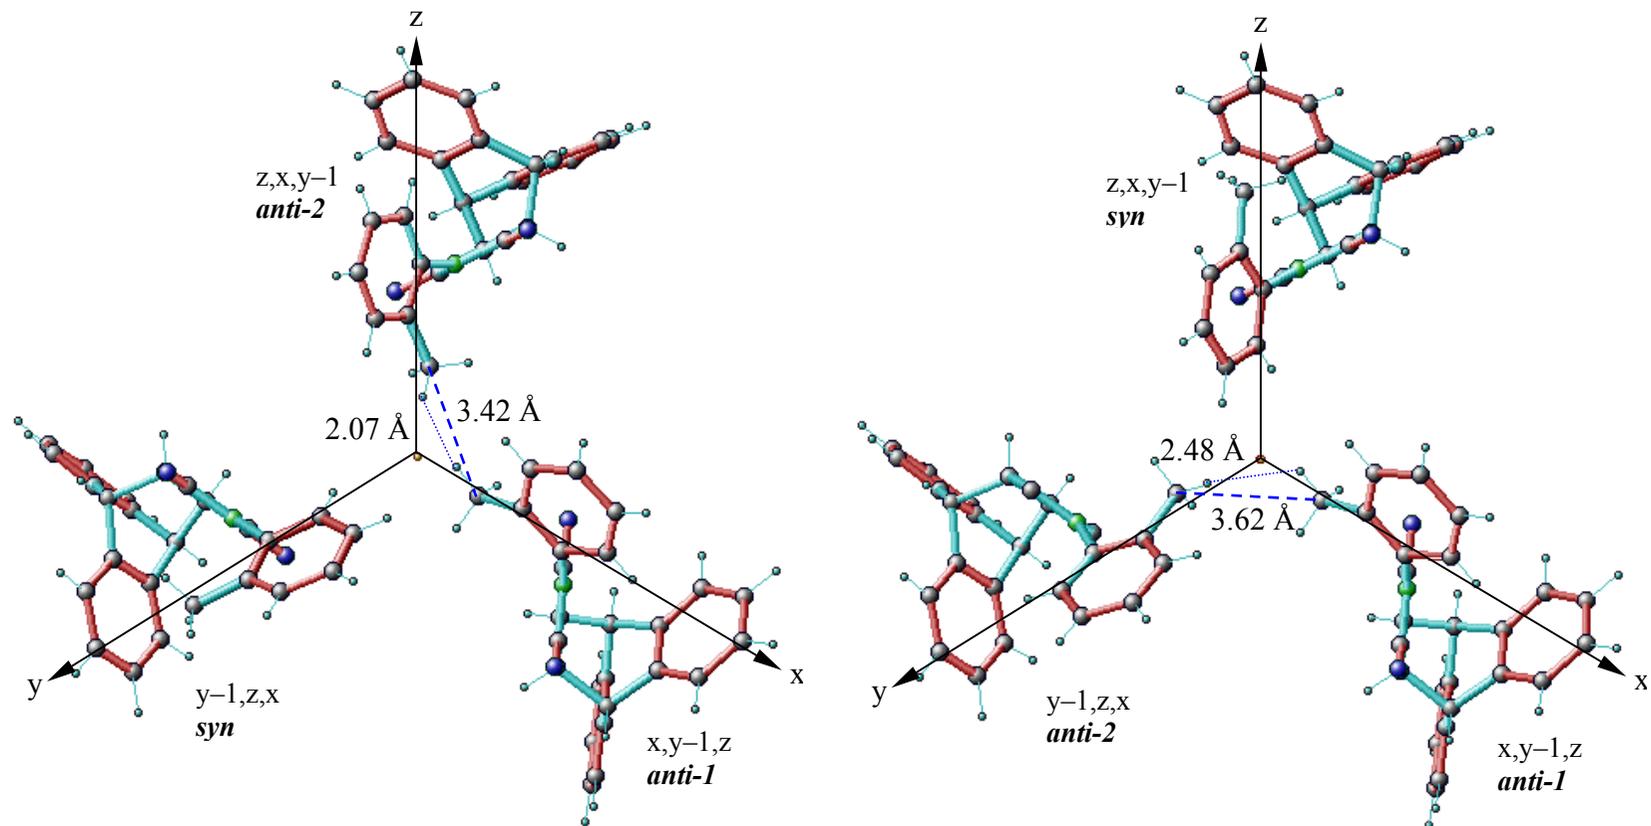

Conformations: *anti-1* all

Conformations: *anti-2* all

Distances C \cdots C are marked with broken lines.

Distances H \cdots H are marked with dotted lines.

Distances C···C are marked with broken lines.

Distances H···H are marked with dotted lines.
