

Electronic supplementary material to: Structural studies of N-(2'-substituted phenyl)-9,10-dihydro-9,10-ethanoanthracene-11,12-dicarboximides by X-ray diffraction and NMR spectroscopy – Proofs for CH/ π interactions in liquid and solid phases (New J. Chem.)

Molecular packing and intermolecular CH/ π interactions of the compound 2

Packing of the independent molecules 1

Packing of the independent molecules 2 (the CH/ π interactions are marked with blue dotted lines)
