## Supplementary information

**Table S1** Calculated energies and conformations of substituted phenylacetic acids **2a** and **2b**

	Substituent	Conformation <sup>a</sup>	<i>E</i> acid a. u.	<i>E</i> anion a. u.
<b>2a</b>	3-CF <sub>3</sub>		-795.4357483	-794.8901097
<b>2b</b>	3-CHO	<i>ap</i>	-572.0588915	-571.5132865
		<i>sp</i>	-572.0586928	-571.5113821
		effective values	-572.0588025	-571.5130628

<sup>a</sup> Conformation on the C3–C(O) bond of the substituent is given in this column.

Conformation on the C1–C(H<sub>2</sub>) bond is uniform in all derivatives, with the C(H<sub>2</sub>)–C(OOH) bond almost perpendicular to the ring plane as in ref. 18.

**Table S2** Calculated energies and conformations of some substituted benzylalcohols **3a** – **3e**

	Substituent	alcohol		anion	
		Conformation <sup>a</sup>	<i>E</i> a. u.	Conformation <sup>b</sup>	<i>E</i> a. u.
<b>3a</b>	H	-. <i>ap</i>	-346.059675	–	-345.4600218
		-, <i>sp</i>	-346.061358		
		effective value	-346.061115		
<b>3b</b>	3-CH <sub>3</sub>	<i>ap</i> , <i>ap</i>	-385.285278	<i>ap</i>	-384.6846218

<sup>a</sup> The conformations are given in the sequence: first on the C1–C(H<sub>2</sub>) bond, second on the C–O bond of the CH<sub>2</sub>OH group, third on the C–C or C–O bond of the substituent. <sup>b</sup>

The conformation are given first on the C1–C(O) of the CH<sub>2</sub>OH group, second on the C–C or C–O bond of the substituent.
