

Supplementary Data

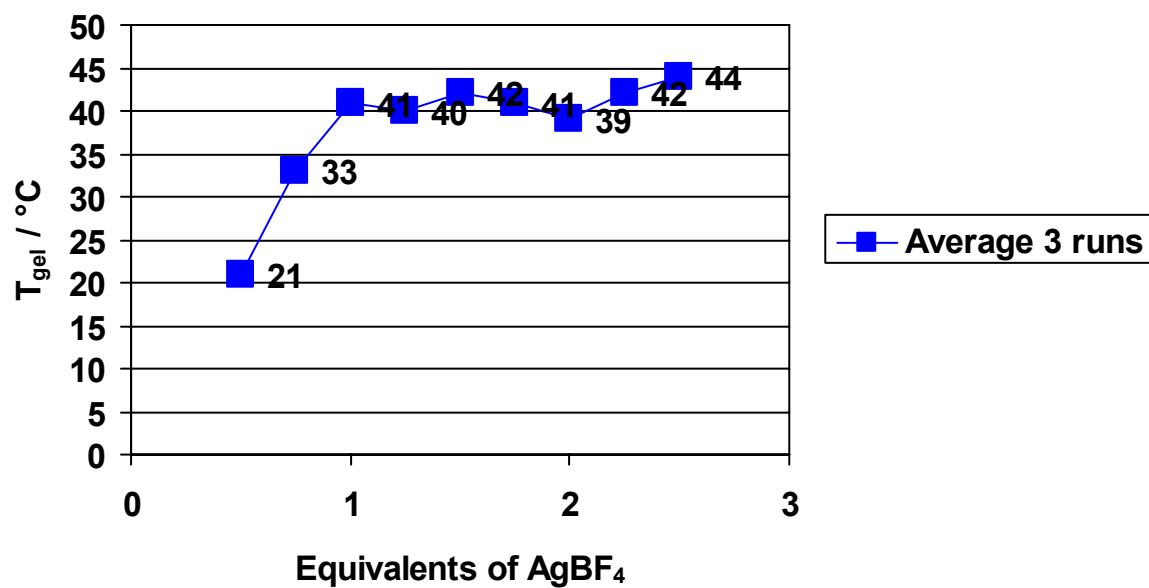

Figure S1 T_{gel} measurements as a function of increasing AgBF_4 concentration for L^{10} . The apparatus for this work is shown in Figure S2.

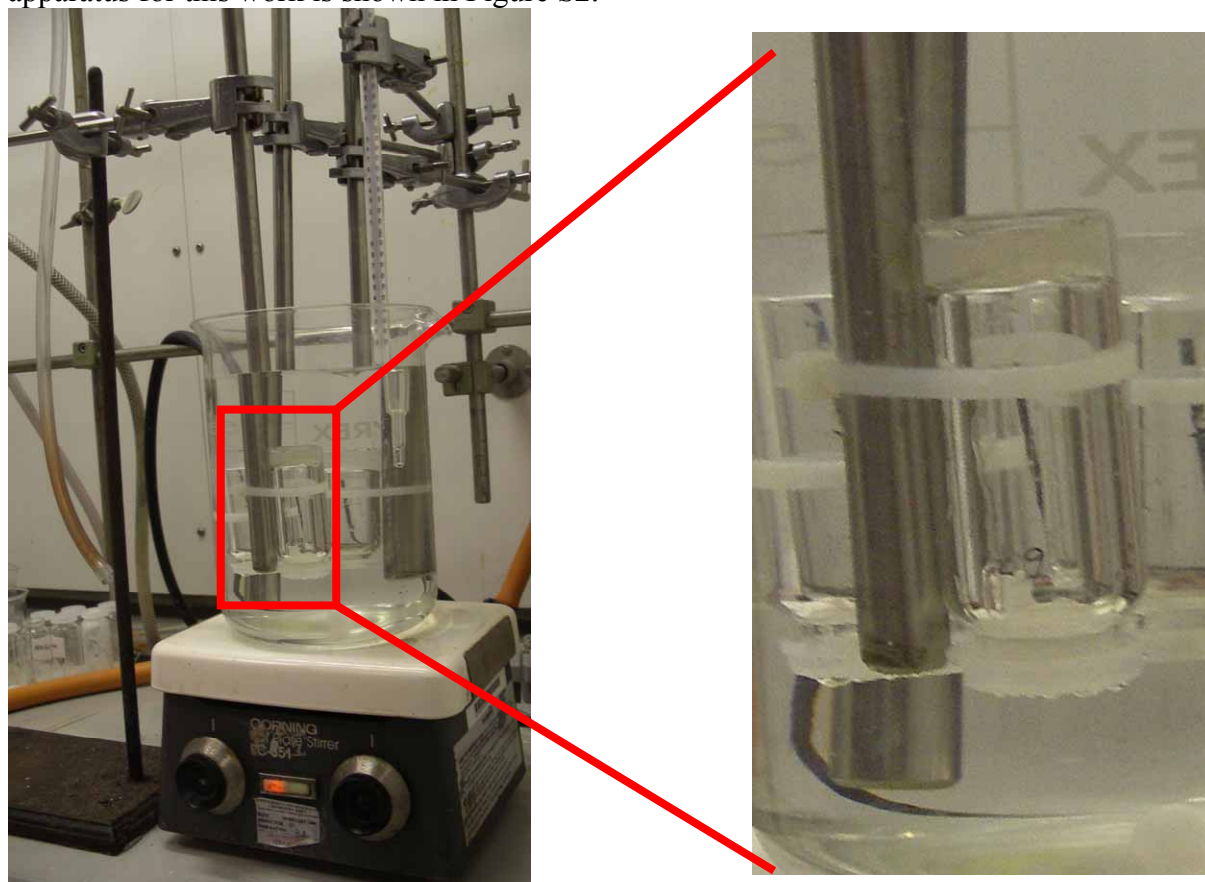

Figure S2 apparatus for T_{gel} measurements

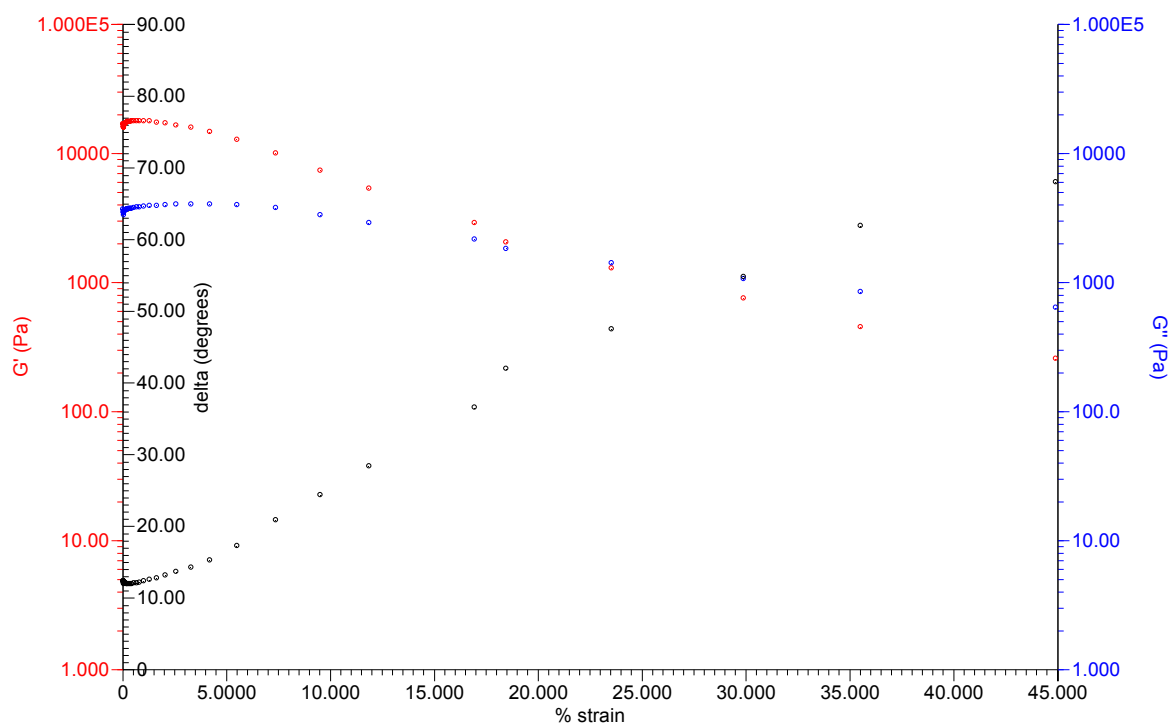

Figure S3 Strain sweep rheometry for a 1:1 mixture of AgNO_3 and L^{10} in thf / water 3:2 1 wt. %.

Figure S4 metallogel formed from L^{13} and silver(I) nitrate (1:1) in water / THF (3:2) at a concentration of 1 % w/v.

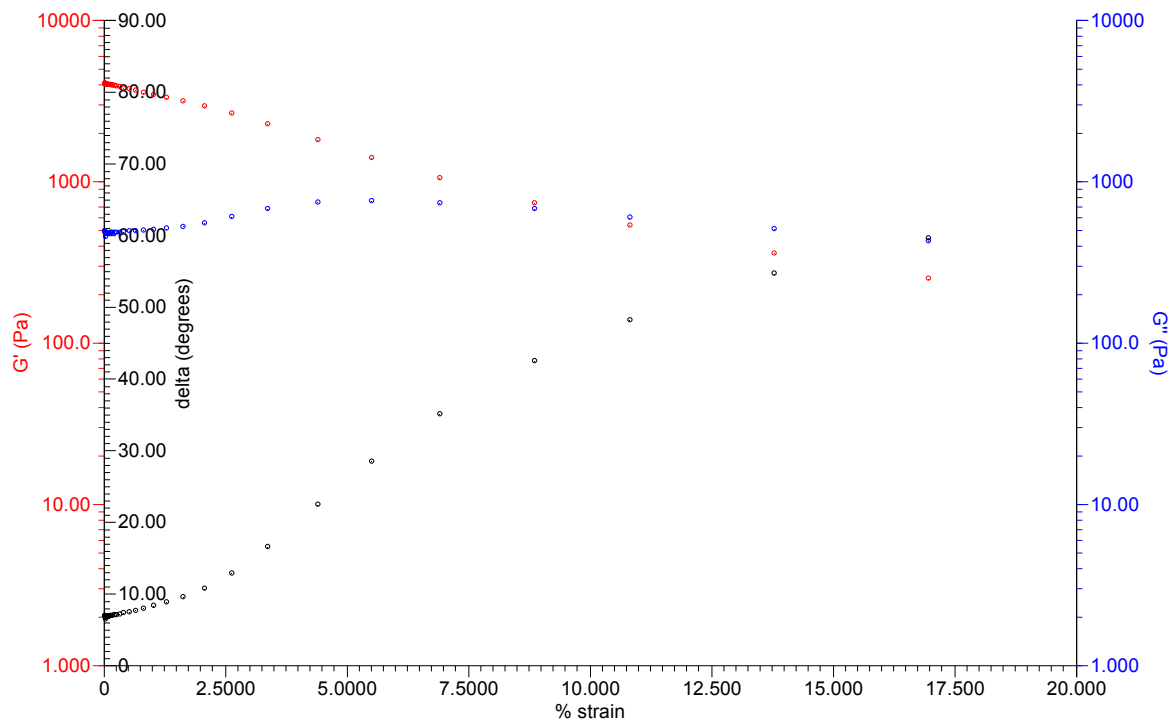

Figure S5 stress sweep rheometry for the metallogel shown in figure S4
