

## Typical HPLC chromatograms of apo-lycopenoids investigated

### Apo-10'-lycopenoids

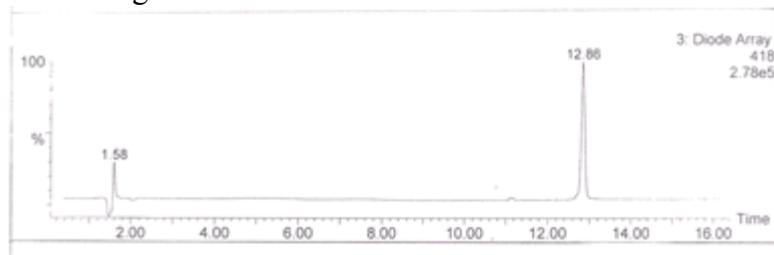

ethyl apo-10'-lycopenoate, **10'-COOEt**

Chromatogram at 442 nm

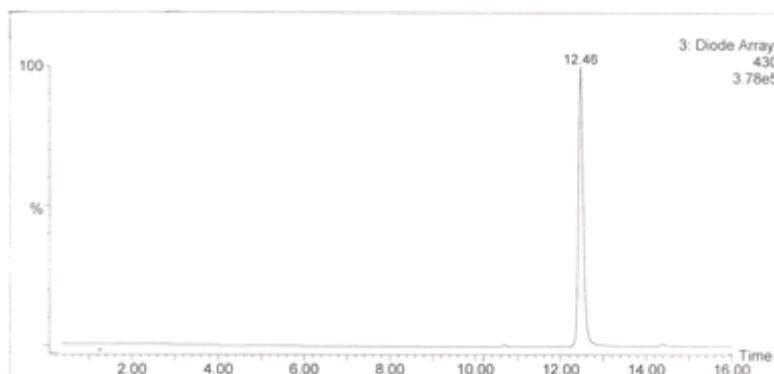

apo-10'-lycopenol, **10'-CH<sub>2</sub>OH**

Chromatogram at 418 nm

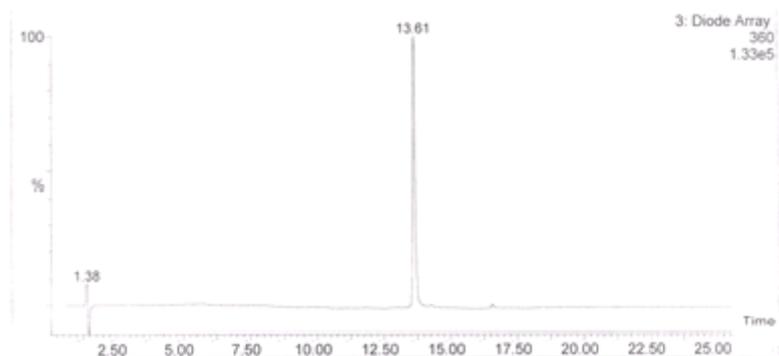

apo-10'-lycopenoic acid, **10'-COOH**

Chromatogram at 430 nm

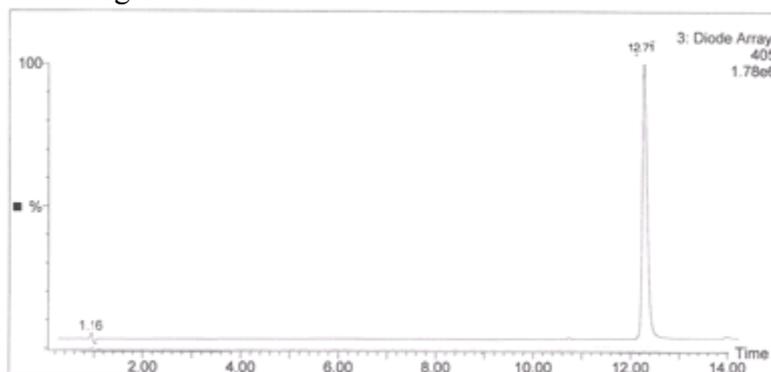

apo-10'-lycopenal, **10'-CHO**  
Chromatogram at 360 nm

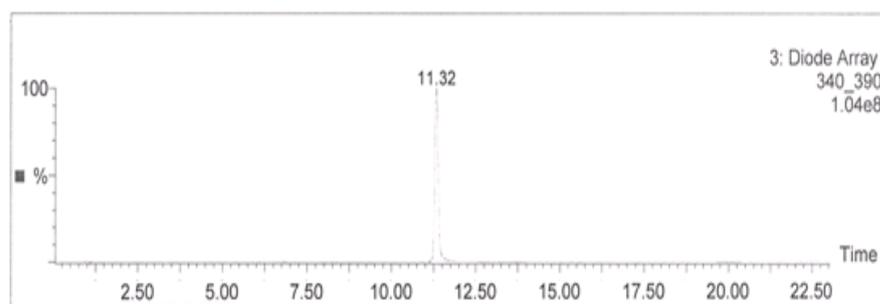

**Apo-14'-lycopenoids**

ethyl apo-14'-lycopenoate, **14'-COOMe**  
Chromatogram at 405 nm

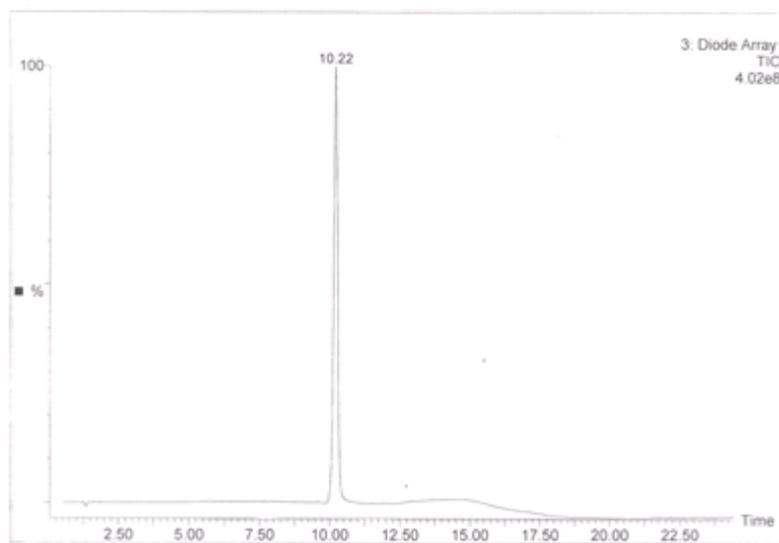

apo-14'-lycopenol, **14'-CH<sub>2</sub>OH**  
Chromatogram between 340 and 390 nm

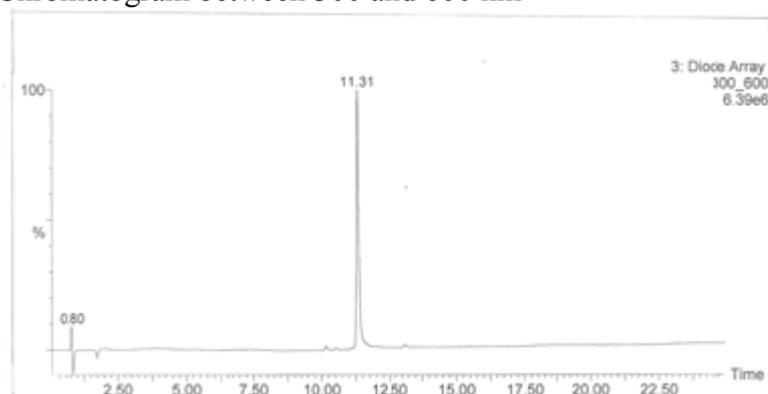

apo-14'-lycopenoic acid, **14'-COOH**

Chromatogram TIC (Total Ion Current between 190 and 600 nm)

apo-14'-lycopenal, **14'-CHO**

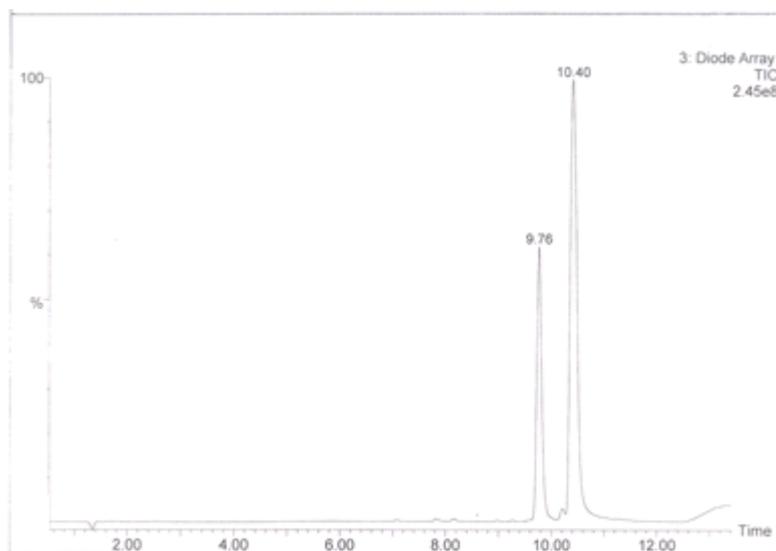

Chromatogram between 300 and 600 nm

## Apo-11-lycopenoids

ethyl apo-1-lycopenoate, **11-COOEt**

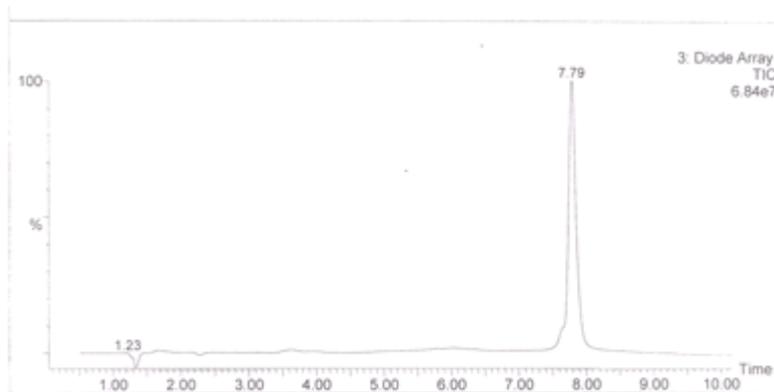

Chromatogram TIC (Total Ion Current between 190 and 600 nm)

9.76 min: (*Z*) isomer; 10.40 min: (*E*) isomer, (*E/Z*) ratio of 3.5

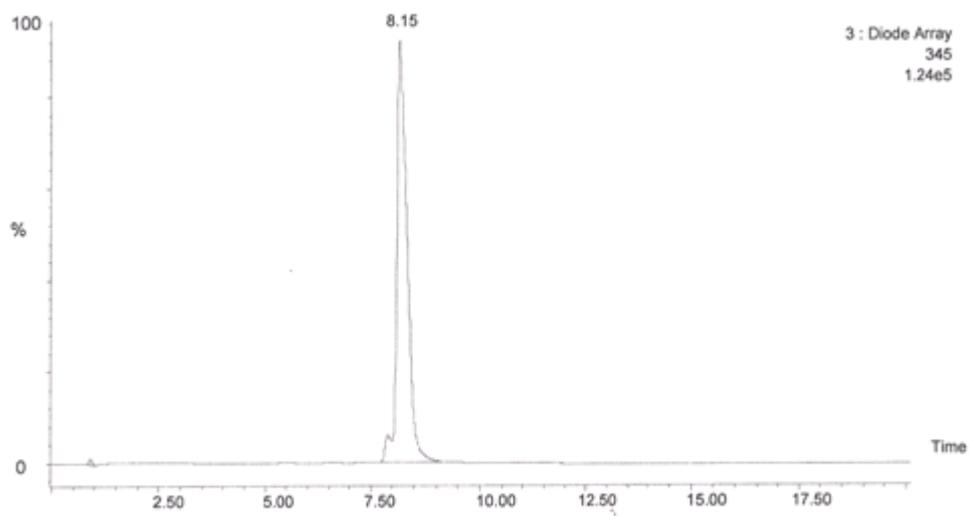

apo-11-lycopenol, **11-CH<sub>2</sub>OH**

Chromatogram TIC (Total Ion Current between 190 and 600 nm)

Shoulder : (*Z*) isomer (3%); 7.79 min: (*E*) isomer (97%).

apo-11-lycopenal, **11-CHO**  
Chromatogram at 345 nm

7.89 min: (*Z*) isomer (4%); 8.15 min: (*E*) isomer (96%).

apo-11-lycopenoic acid, **11-COOH**  
Chromatogram at 300 nm
