

Supporting Information (SI)

Bi-directional-bi-dimensionality alignment of self-supporting Mn_3O_4 nanorod and nanotube arrays with different bacteriostasis and magnetism

Qun Chen, Chengzhen Wei, Feng Gao,* Huan Pang, Qingyi Lu*

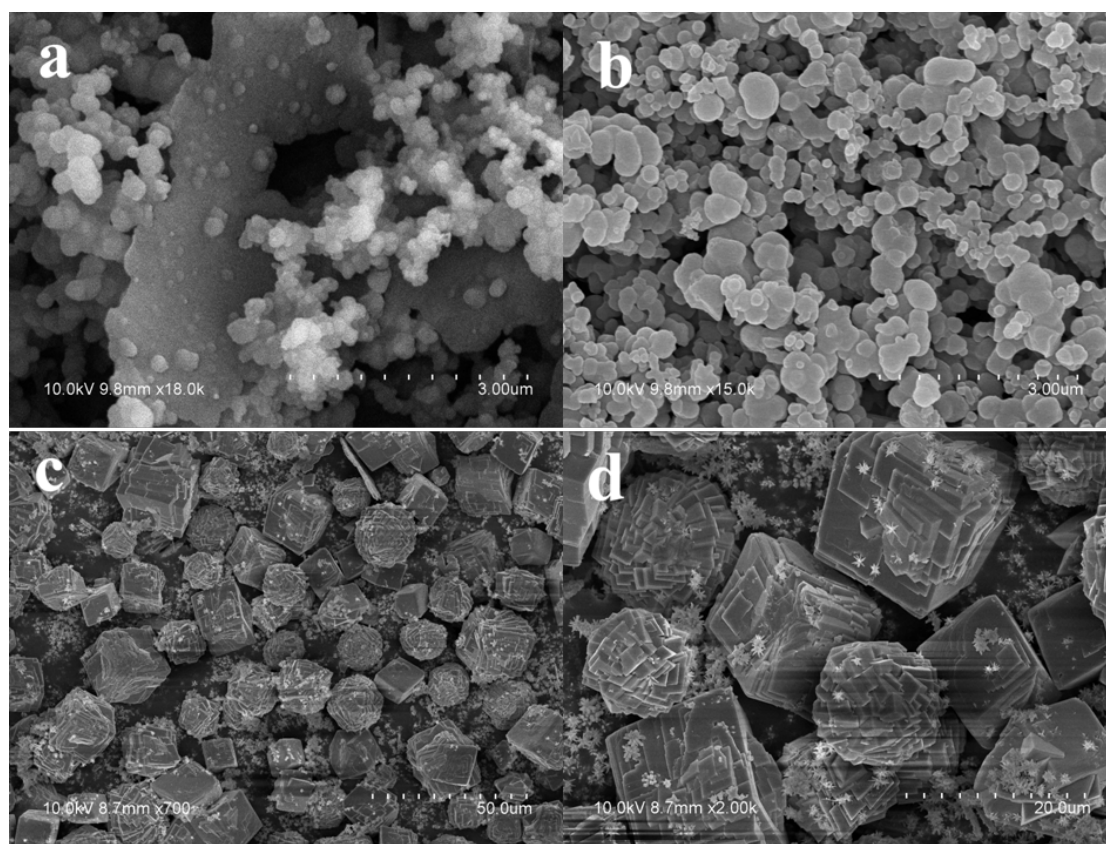

Figure S1 (a) an SEM image of the product prepared with the addition of 0.02 g of sodium gluconate but without the addition of urea; (b) an SEM image of the product prepared with the addition of 0.05 g of sodium gluconate but without the addition of urea; (c, d) SEM images of the product prepared with the addition of 0.01 g of urea but without the addition of sodium gluconate.

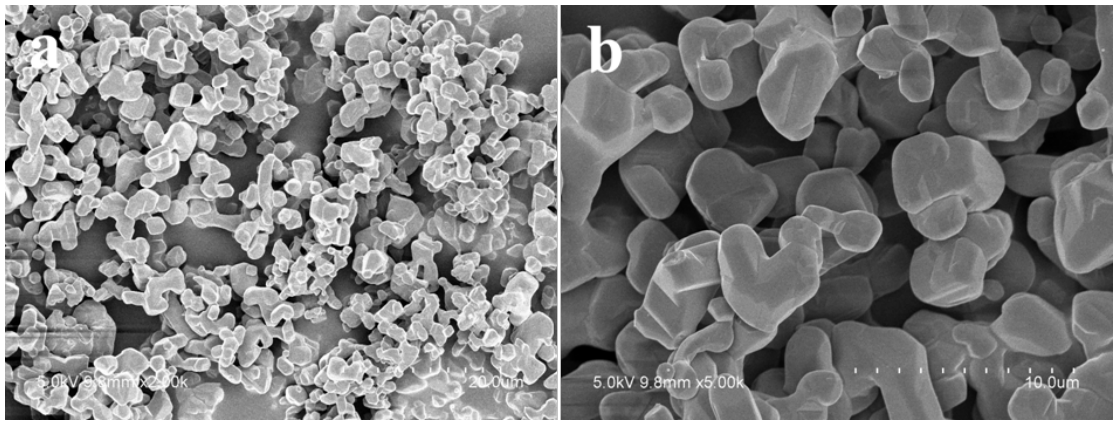

Figure S2 SEM images of the commercial Mn₃O₄ powders.
