## (A) General Information

NMR spectra were recorded on a Brucker AV 300 instruments. IR spectra were recorded on a Perkin Elmer FT IR 1600 spectrometer (ATR). Mass spectra were obtained on a Hewlett-Packard HPGC/MS 5890/5972 instrument (EI, 70 eV) by GC inlet or on a MX-1321 instrument (EI, 70 eV) by direct inlet. Column chromatography was performed on silica gel (63–200 mesh, Merck), silica gel Merck 60F<sub>254</sub> plates were used for TLC. All solvents were purified and dried by standard methods. The starting 3-acylchromones **1–3** were prepared according to described procedures.<sup>6–8</sup>

## (B) Typical experimental procedures

### General procedure for the synthesis of compounds **4–8**

To a stirred reaction mixture of the corresponding chromone (1.0 mmol) and 1,3-C,C-dinucleophile (1.1 mmol) in dioxane (6–7 mL), DBU (0.20 mL, 1.3 mmol) was added slowly via a syringe at room temperature. Stirring at room temperature (for dimethyl acetonedicarboxylate) or at reflux (for 1,3-diphenylacetone) was continued until chromone was consumed completely (followed by TLC, approximately 10–12 h). The reaction mixture was quenched with aqueous solution of 10% NH<sub>4</sub>Cl and extracted with chloroform, dried (Na<sub>2</sub>SO<sub>4</sub>), the solvent was distilled off under reduced pressure, and the resulting residue was subjected to column chromatography on silica gel using heptane–ethylacetate (5:1) as eluent, slowly increasing the polarity up to 3:1 to give the isolated products.

### General procedures for the synthesis of compounds **9** and **10**

To a stirred reaction mixture of the corresponding compound **4** or **5** (1.0 mmol) in methanol (6–7 mL) potassium hydroxide (8.0 mmol) was added. The reaction mixture was heated under reflux. Stirring and heating were continued until reagent was consumed completely (followed by TLC, approximately 2 days). The solvent was distilled off in vacuum and the resulting residue was quenched with water, then neutralized with aqueous solution of HCl (30%). The resulting residue was filtered and dried.
