

Supplemental Data

5
Figure S1. Field SMFC power (blue line) and WP (red line) during the deployment period from August to December 2011.

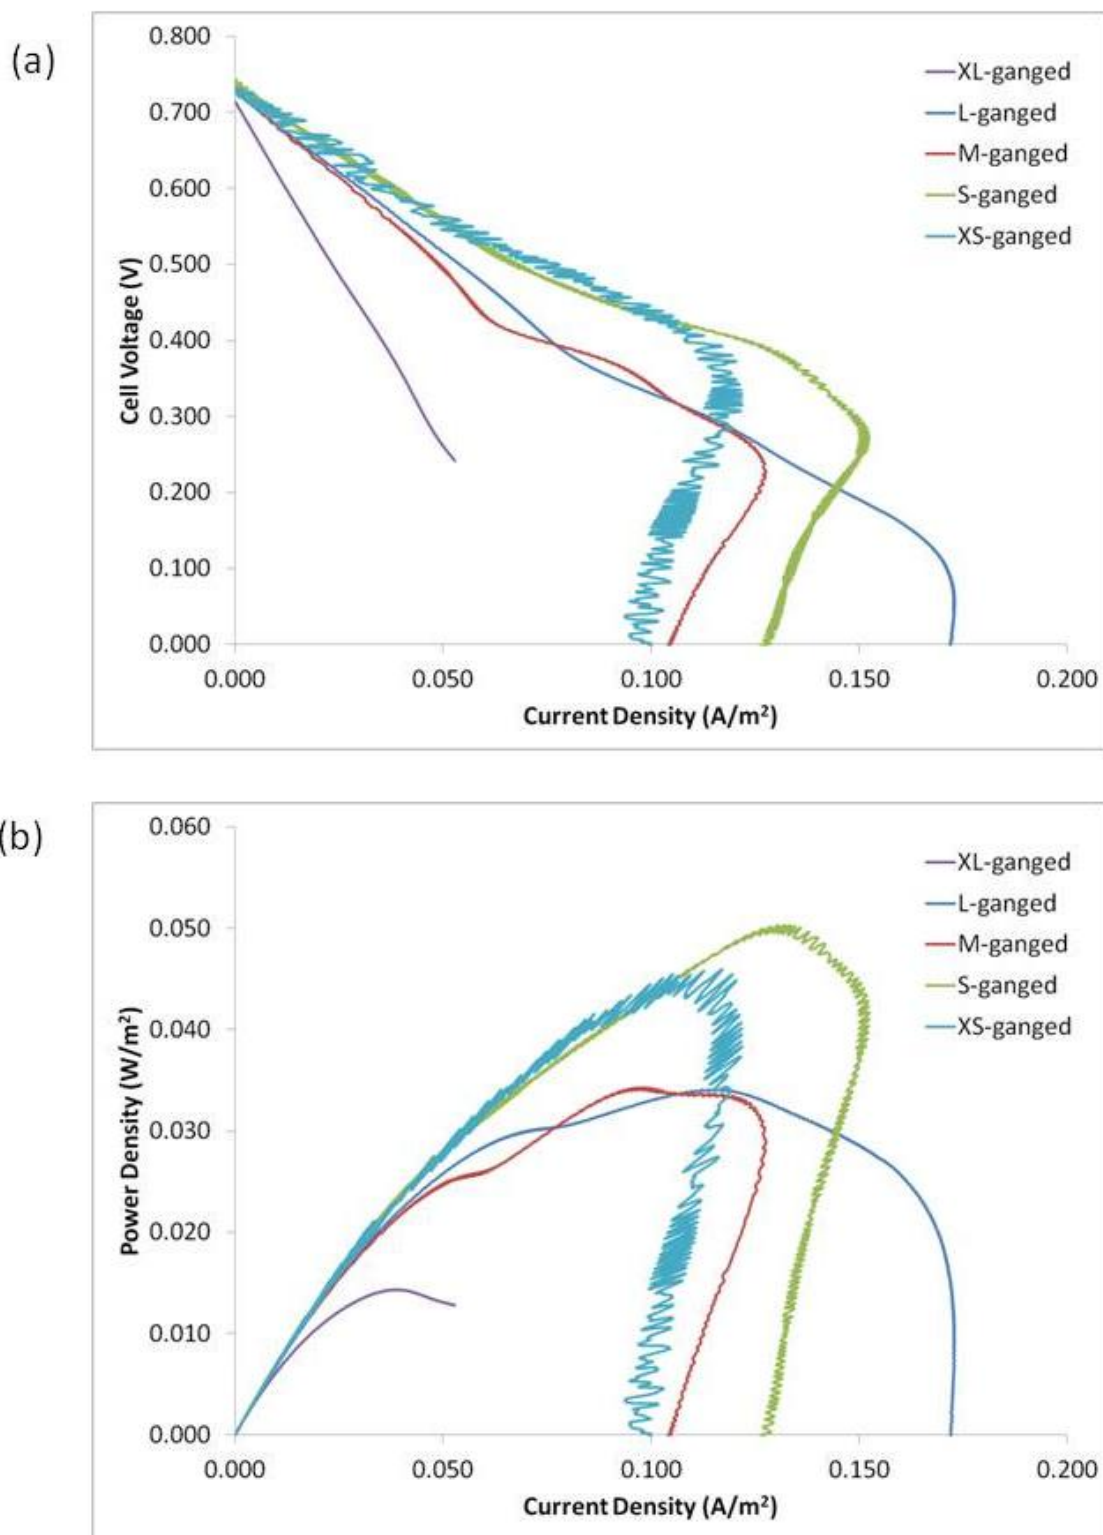

Figure S2. (a) Polarization sweep and (b) power density curves for each of the multi-anode systems. These multi-anode systems were created from steady state anode replicates used in generating data for Figure 2. (XL-ganged = 2 x 6400cm² [12,800cm² total]; L-ganged = 2 x 1600cm² [3200 cm² total]; M-ganged = 3 x 400 cm² [1200cm² total]; S-ganged = 3 x 100 cm² [300cm² total]; XS-ganged = 3 x 25 cm² [75 cm² total].
