

**SUPPORTING INFORMATION:**

**Concentric Ring-banded Spherulites of Six-arm Star-shaped Poly  
( $\epsilon$ -caprolactone) via Subcritical CO<sub>2</sub>**

Yifan Zhang, Xia Liao,\* Xianglin Luo, Suilin Liu, Qi Yang, Guangxian Li\*

*Figure S1.* PCL treated with CO<sub>2</sub> at 4 MPa and 28 °C for 4 h and subsequently quenched to ambient pressure in 7 s.

*Figure S2.* PCL samples were treated with CO<sub>2</sub> at 28 °C for 4 h at various pressures: (a) 1 MPa; (b) 2 MPa; (c) 8 MPa.
