## Electronic Supplementary Information (ESI) for

## Nanostructured Superhydrophobic Silk Fabric Fabricated Using the Ion Beam Method

Ji-Hyun Oh <sup>ab</sup>, Tae-Jun Ko <sup>b</sup>, Myoung-Woon Moon <sup>b\*</sup>, and Chung Hee Park <sup>a\*\*</sup>

<sup>a</sup> Department of Clothing and Textiles, Seoul National University, Seoul, 151-742, Republic of Korea. E-mail: junghee@snu.ac.kr

<sup>b</sup> Institute of Multidisciplinary Convergence of Matter, Korea Institute of Science and Technology, Seoul, 136-791, Republic of Korea. E-mail: mwmoon@kist.re.kr

**Fig. S1** Optical images of superhydrophobic property of the silk fabric with different stretching: (a) 0%, (b) 10%, (c) 20%, (d) 30%, (e) 40%

**Fig. S2** Optical images of superhydrophobic property of the bended silk fabric: (a) superhydrophobic silk fabric, (b) superhydrophobic silk fabric bended by a weight, (c) water droplets on the surface of superhydrophobic silk fabric.
