

## Supporting Information for

### N-doped carbon nanosheets with antibacterial activity: Mechanistic insight

Amlan Chakraborty,<sup>a†</sup> Pranav Patni,<sup>a†</sup> Deepa Suhag,<sup>a†</sup> Gajender Saini,<sup>b</sup> Anirudha Singh,<sup>c</sup>  
Sandip Chakrabarti<sup>d\*</sup> and Monalisa Mukherjee<sup>a\*</sup>

<sup>a</sup>Amity Institute of Biotechnology, Amity University Uttar Pradesh 201303, India

<sup>b</sup>Advance Instrumentation Research Facility, Jawaharlal University, New Delhi, India

<sup>c</sup>Faculty of Translational Tissue Engineering Center & Dept. of Urology, Johns Hopkins School of Medicine  
Baltimore, Maryland Area

<sup>d</sup>Amity Institute of Nanotechnology, Amity University Uttar Pradesh 201303, India

## SI 1

**Table 1: Carbon, Hydrogen, Nitrogen and Oxygen percentages from CNS and CCM**

Sample Name	C atom %	H atom %	N atom %	O atom %
CNS	82.01	1.28	1.75	14.72
CCM	83.29	1.34	0.00	15.11

## SI 2

### XRD
