

One set of AFM measurements showing the structure of SbpA on polyelectrolyte multilayers as a function of temperature. At 55°C the 2D crystal structure is lost. (No flattening or other type of image treatment has been applied to the figures)

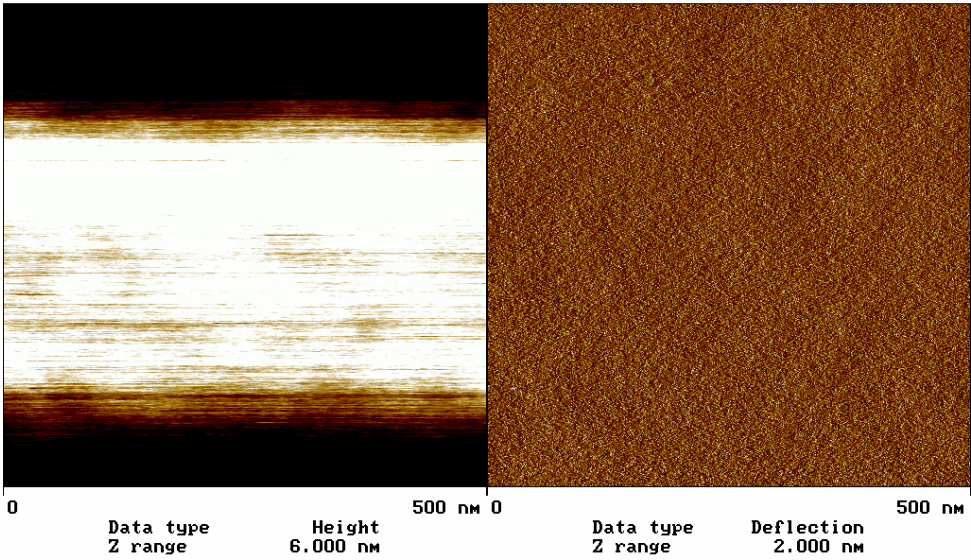

T = 20 °C

T = 30 °C

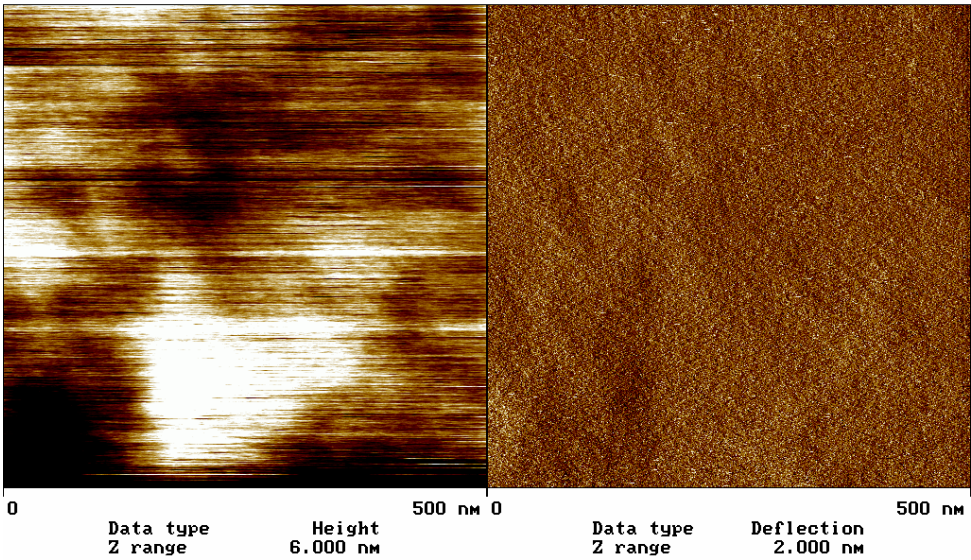

T = 40 °C

40.002

T = 50 °C

50.001
