

## SUPPORT INFORMATION

### Stepwise surface tailoring of carbon nanotubes with polyelectrolyte brushes and lipid layers to control their intracellular distribution and “in vitro” toxicity

G. Romero, I. Estrela-Lopis, P. Castro-Hartmann, E. Rojas,  
I. Llarena, D. Sanz, E. Donath and S. E. Moya

**Fig. S1.** TEM images of modified CNT stained with Sodium Tungstate: oxidised CNTs (A), PSPM coated CNTs (B) and lipid coated CNTs (C)

**Fig. S2.** Raman spectra of different surface modified carbon nanotubes.
