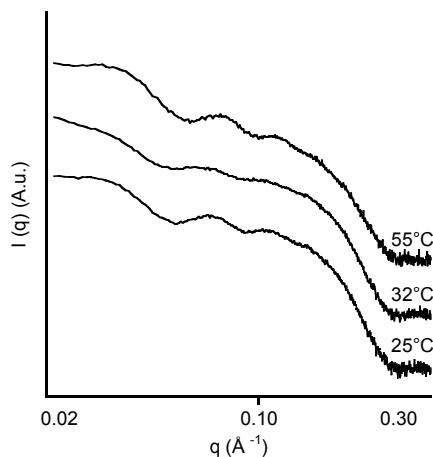

Figure S1. Log-Log plot of SAXS patterns reported as stack plot of the VLG sample with composition MO/LCh/W = 13.2/1.2/85.6 (wt%) collected at 25, 32, and 55 °C.

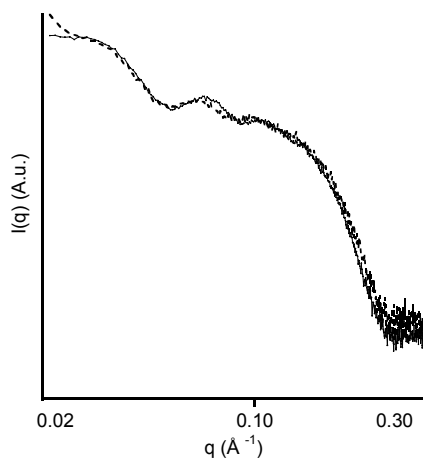

Figure S2. Log-Log plot of SAXS patterns collected at 25 °C of the VLG sample empty (solid line) and loaded with 1 mg/g of HDCF (dashed line).
