

Supporting Information

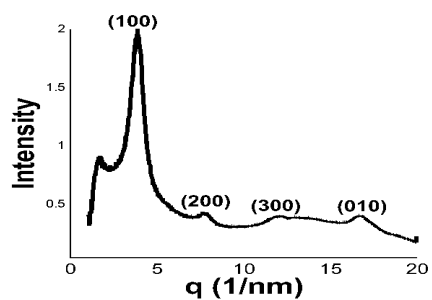

Fig. S1 Wide angle X-ray scattering (WAXS) of poly3-hexylthiophene (P3HT) film cast using chloroform. The plot shows clear molecular order with lamellar ($h00$) peaks and p-p stacking (010) peak.

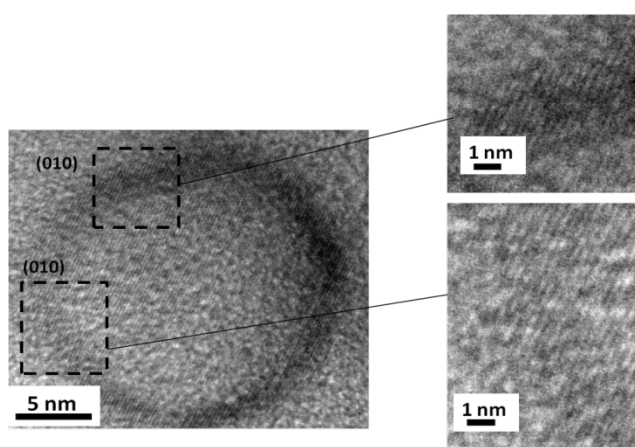

Fig. S2 Transmission electron microscopy (TEM) images of poly 3-hexylthiophene (P3HT) film showing π - π interchain stacking with sub-nanometer domain spacing.
