

Supporting Information for

Patchy nanoparticles self-assembled from linear triblock copolymers under spherical confinement: A simulated annealing study

Bin Yu, Jianhua Deng, Baohui Li, An-Chang Shi

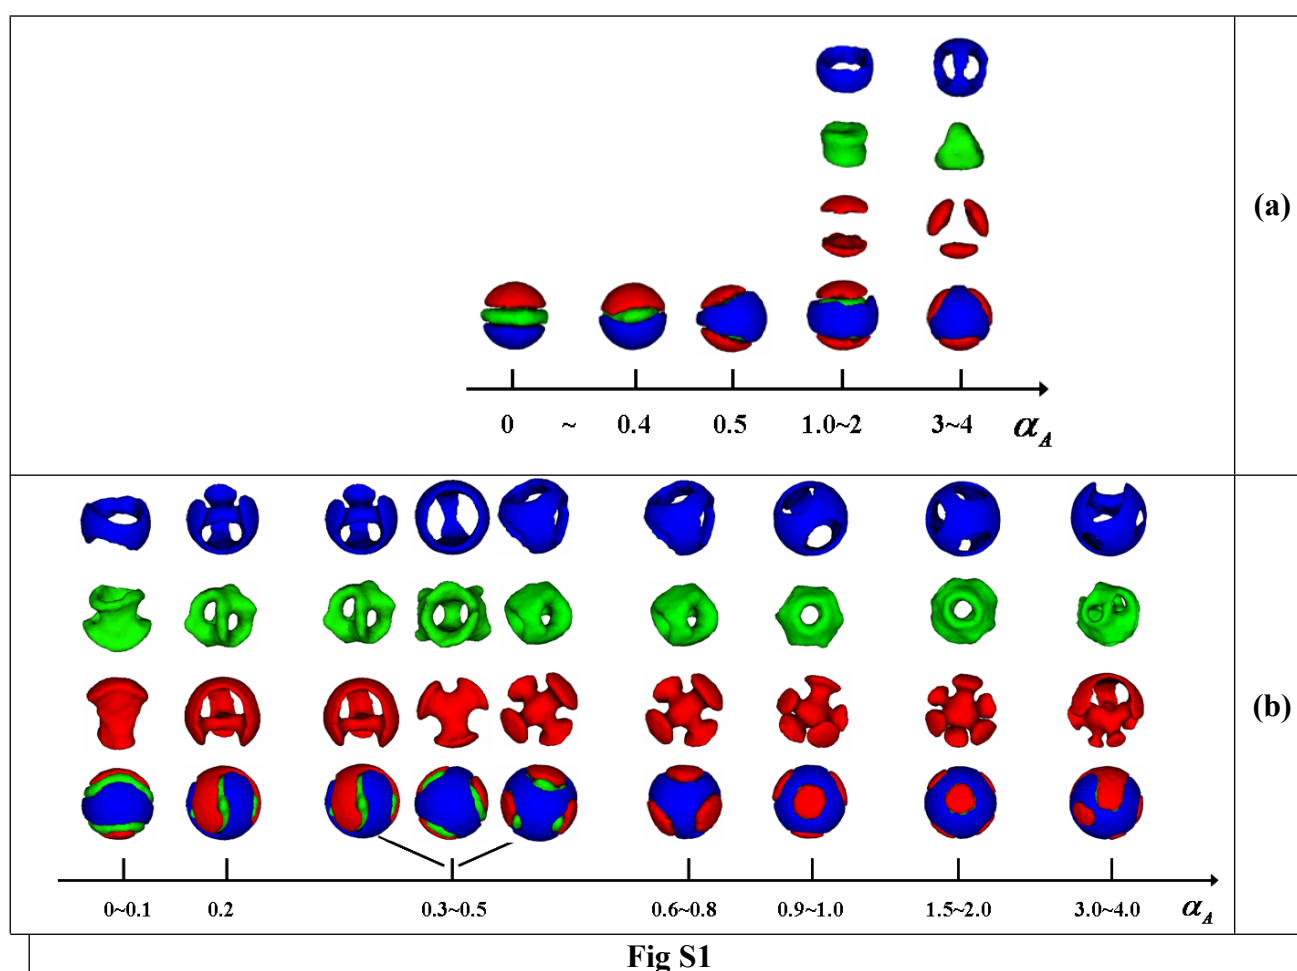

Fig S1

Figure S1. Self-assembled morphologies as a function of α_A for triblock copolymers $A_8B_8C_8$ confined in nanopores with $\alpha_A=\alpha_C$. (a) $D/L_0=0.9$; (b) $D/L_0=1.5$.
