Figure S4 Equivalent circuit I (A). It consists of ohmic (R_s), SEI film (R_{SEI}) and charge transfer (R_{ct}) resistances, the SEI (CPE_{SEI}) and double layer (CPE_{dl}) capacitance, along with a diffusion component (CPE_D). Equivalent circuit II (B). It consists of ohmic (R_s) and SEI film (R_{SEI}) resistances, the SEI (CPE_{SEI}) capacitance, the parallel inductance (L) and resistance (R_L) along with a diffusion component (CPE_D).
