Table 5: Mean and standard error of EC₅₀-values and fitting parameters of concentration-response curves of *C. vulgaris* cells immobilized within alginate/silica hydrogels after repeated usage and intermediate storage at 4 °C in the dark (corresponding to Fig. 8A) as well as intermediate storage at 20 °C under a 14/10h light/dark cycle (corresponding to Fig. 8B). A_{min} was fixed at 0. (N=6). For vitality validation of repeatedly used samples, Y(I) was evaluated for all samples after recovery prior to each exposure cycle; the mean value is given in the tables.
